About Dairymark.com

Dairymark.com is a division of Shainwright Consulting and Research Group Pty Ltd, and is a specialist dairy industry intelligence and consulting organization. The company has completed numerous strategic, market and business development dairy research assignments for Australian and international clients, including dairy companies, dairy industry associations, dairy industry supply companies, and government bodies. Recent examples include:

- Review of key indicators of dairy farm performance in Australia
- Bangladesh dairy market study
- An overview of global dairy supply & demand
- A longitudinal dairy pricing study
- A strategic review of dairy industry patent activity
- A strategic review of dairy R&D activity
- A strategic review of trends in whey permeate utilization
- A study of the Australasian dairy industry
- Strategic research identifying trends and opportunities in Asian feed markets for dairy ingredients

In addition, the company has published an expanding portfolio of multi-client reports, including:

- Milk ingredients – a strategic review of opportunities and applications in the oral care industry
- Dairy carbohydrates – a strategic review of opportunities and applications
- Dairy permeates – a strategic review of opportunities and applications
- Buttermilk solids – a strategic review of opportunities and applications
- Colostrum – a strategic review of opportunities and applications
- Global ice cream industry – strategic market, international trade & production review
- Dairy ingredients – a strategic review of opportunities and applications in the cream liqueur industry

More information on Dairymark.com, its capabilities, experience, geographic coverage and multi-client reports is available on the company website – visit at www.dairymark.com

Table of Contents

1. Executive Summary & Strategic Synopsis ................................................................. 1
   1.1. A strategic precursor to the report ................................................................. 1
   1.2. Executive synopsis ....................................................................................... 4

2. Carbohydrates ........................................................................................................ 12
   2.1. Understanding dietary carbohydrates – a DP approach .............................. 12
   2.2. Carbohydrates as food ingredients .............................................................. 14
   2.3. Lactose – the chief carbohydrate from milk ............................................... 15
   2.4. The preparation of lactose .......................................................................... 15
   2.5. Trends in global lactose production ............................................................. 17
   2.6. Projected future global supply of lactose ..................................................... 18
   2.7. Applications of lactose ................................................................................. 20

3. Oligosaccharides ..................................................................................................... 22
   3.1. Oligosaccharides - definition and major types .............................................. 22
   3.2. Global market volume estimates ................................................................... 23
   3.3. Oligosaccharides – functional & physico-chemical attributes ...................... 25
   3.4. Preparation of oligosaccharides .................................................................... 27
   3.5. Commercial production of oligosaccharides ................................................ 30
   3.6. Oligosaccharides as food ingredients .......................................................... 32
   3.7. Oligosaccharides in Japan’s FOSHU system ............................................... 34
   3.8. The physiological influences of oligosaccharides ........................................ 37
   3.9. Non-food applications for oligosaccharides ............................................... 38

4. Food Products Formulated with GOS – A Global Overview ................................ 39
   4.1. Infant Milk Formula ...................................................................................... 39
   4.2. Follow-on Milk Formula ............................................................................. 41
   4.3. Growing-up Milk Formula ........................................................................... 42
   4.4. Other food products ..................................................................................... 45

5. Food Standards Australia and New Zealand – Assessment on Inulin/FOS & GOS Added to Foods ................................................................. 47
   5.1. Background .................................................................................................. 47
   5.2. Recommendations arising .......................................................................... 47
   5.3. A review of international regulations and use .............................................. 48

6. Oligosaccharides as Prebiotics .............................................................................. 52
   6.1. Prebiotics, colon microflora & health ........................................................... 52
   6.2. Mechanisms of prebiotic action on health .................................................. 53
   6.3. Bifidobacteria .............................................................................................. 55
   6.4. Different types of prebiotics .......................................................................... 56

7. Food Products Formulated with Oligosaccharides – A Global Overview .......... 58
   7.1. Dairy-based dietetic foods ............................................................................ 58
   7.2. Consumer dairy products ........................................................................... 59
   7.3. Baked and cereal products .......................................................................... 60
   7.4. Children’s foods ........................................................................................... 60
   7.5. Companion animal foods ............................................................................ 61
   7.6. Non-dairy beverage products ...................................................................... 62
   7.7. Dietary supplements .................................................................................... 63
   7.8. Other food products .................................................................................... 63

8. Galacto-oligosaccharides ..................................................................................... 64
8.1. Definition, preparation and composition ................................................................. 64
8.2. GOS manufacturing methods .................................................................................. 66
8.3. Commercially prepared GOS .................................................................................. 67
9. Borculo Whey Products – Elix’or Dietary Ingredient Notification to U.S. FDA ............ 69
9.1. Overview .................................................................................................................. 69
9.2. Manufacture of Elix’or GOS .................................................................................. 69
9.3. Proposed use of Elix’or as a dietary supplement .................................................... 70
9.4. Elix’or as a prebiotic food ingredient ................................................................... 71
9.5. Product specification – Elix’or Syrup .................................................................... 72
9.6. Product specification – Elix’or Powder .................................................................. 73
10. Galacto-oligosaccharides – Key Attributes .............................................................. 74
10.1. Physico-chemical characteristics of GOS ............................................................... 74
10.2. Physiological characteristics of GOS ................................................................. 74
10.3. The prebiotic effect of galacto-oligosaccharides ................................................... 75
10.4. The health-related effects of galacto-oligosaccharides ........................................ 76
10.5. Symbiotics ............................................................................................................ 77
10.6. Oligosaccharides in breast milk – biological functions .......................................... 77
11. Applications for GOS .............................................................................................. 80
11.1. Oligosaccharides – continually challenging the boundaries .................................... 80
11.2. GOSs become established ..................................................................................... 82
11.3. GOS as a food ingredient ....................................................................................... 83
11.4. GOS incorporated in infant formula .................................................................... 84
11.5. Other target consumer groups for GOS ................................................................. 87
12. Value-adding New Technology Initiatives for GOS .................................................. 89
12.1. Fractionation of oligosaccharides by nano-filtration .............................................. 89
12.2. Developing novel oligosaccharide-enriched whey ingredients as prebiotic agents ... 90
12.3. Commercial isolation and preparation of high purity TOS ..................................... 91
12.4. High GOS buttermilk powder .............................................................................. 92
12.5. Recovery of oligosaccharides from human milk ................................................... 94
13. Company Profile – Kerry Dairy Ingredients ............................................................ 95
13.1. Corporate overview .............................................................................................. 95
13.2. Profile™ GOS – enriched whey powder ................................................................. 96
14. Company Profile – First Milk Ingredients ............................................................... 97
14.1. Corporate overview .............................................................................................. 97
14.2. Promovita® GOS .................................................................................................. 97
15. Company Profile – Friesland Foods Domo ............................................................... 100
15.1. Company overview ............................................................................................. 100
15.2. FrieslandCampina NV – overview of proposed merger ........................................ 100
15.3. Vivinal GOS ......................................................................................................... 102
15.4. Vivinal GOS achieves GRAS status in U.S. market ........................................... 102
15.5. Use of Vivinal GOS in Friesland’s CoolBest Vltaday juice .................................... 103
15.6. Vivinal GOS plant expansion .............................................................................. 103
15.7. GOS joint venture in Australia .......................................................................... 104
16. Company Profile – Yakult Honsha ......................................................................... 105
16.1. Corporate overview ............................................................................................. 105
16.2. Oligomate ............................................................................................................ 107
16.3. TOS propionate agar medium ............................................................................. 109
# List of Figures
